

[Sep-2019 Exam Pass 100% !Braindump2go 200-310 VCE Dumps and 200-310 PDF Dumps 694Q Instant Download(New Questions)]

Sep/2019 Braindump2go 200-310 Exam Dumps with PDF and VCE New Updated Today! Following are some new 200-310 Exam Questions:1. |2019 Latest Braindump2go 200-310 Exam Dumps (PDF & VCE) Instant

Download:<https://www.braindump2go.com/200-310.html>2. |2019 Latest Braindump2go 200-310 Exam Questions & Answers Instant

Download:<https://drive.google.com/drive/folders/0B75b5xYLjSSNbmNsWnFEczRBdU0?usp=sharing>New QuestionsWhat are the three models that are required in the systematic approach of the top-down design methodology? (Choose three.)A. logicalB. physicalC. layeredD. network componentsE. technologicalF. protocolsG. virtual

Answer: ABCNew QuestionsWhat design requirement is necessary for campus network access layer switching?A. high cost per portB. high availabilityC. high scalability

D. high performance**Answer: C**New QuestionsWhich two issues are typical challenges to network stability and reliability?

(Choose two.)A. hardware failuresB. layer 1 link failuresC. application failuresD. core layer failuresE. distribution layer failures

Answer: ABNew QuestionsIf two routing protocols have the same route and prefix, which effect do they have on the routing

table?A. Only the route with the lowest administrative distance is added.B. Only the route with the highest administrative

distance is added.C. Both routes are added.D. Neither route is added, and a loop is formed.**Answer: A**New QuestionsWhich two

options are benefits of using a modular network architecture? (Choose two.)A. facilitates troubleshootingB. accurate monitoring

C. consistent documentationD. increased flexibilityE. reduced cabling requirements**Answer: AD**New QuestionsWhat is a

benefit of IPv6 over IPv4 addresses?A. shorter addressesB. automatic summarizationC. hierarchal global address spaceD.

faster IGP convergence**Answer: C**New QuestionsDrag and Drop QuestionDrag the security term on the left to the matching

description on the right. Answer: New QuestionsWhich statement describes the recommended deployment of DNS and DHCP

servers in the Cisco Network Architecture for the Enterprise?A. Place the DHCP and DNS servers in the enterprise campus access

layer and enterprise branch.B. Place the DHCP and DNS servers in the enterprise campus server farm layer and enterprise branch.

C. Place the DHCP server in the enterprise campus core layer and remote access and VPN module, and place the DNS server in

the Internet connectivity module.D. Place the DHCP server in the enterprise campus distribution layer, and place the DNS server

in the Internet connectivity module.**Answer: B**Explanation: For the Enterprise Campus, DHCP and internal DNS servers should be

located in the Server Farm and they should be redundant. External DNS servers can be placed redundantly at the service provider

facility and at the Enterprise branch.New QuestionsFor a VLAN that requires 70 hosts, which subnet is the most efficient?A.

10.0.0.1/8B. 172.31.17.0/26C. 192.168.1.0/25D. 192.168.15.0/24**Answer: C**New QuestionsDrag and Drop QuestionDrag the

STP toolkit term on the left to the definition on the right. Answer: New QuestionsWhich item is the fundamental basis of a virtual

network?A. a VRF instanceB. a MIB databaseC. a GRE tunnelD. redundant hardware**Answer: A**New QuestionsYour

company uses OSPF for internal routing. The company will be connected to VendorA via a single dedicated link and to VendorB via

redundant dedicated links. Both vendors also use OSPF for internal routing.Which of the following deployments describes the best

intra-domain routing practice in this situation?A. Connect your company to both VendorA and VendorB using existing OSPF.B.

Redistribute the routes on each link between your company and the vendors to a shared EIGRP routing protocol.C. Use IBGP to

reach VendorA and EBGP to reach VendorB.D. Use static routes to reach VendorA and EBGP to reach VendorB.E. Use static

routes to reach both VendorA and VendorB.**Answer: D**New QuestionsIn which operation mode does the AP act as a dedicated

sensor for location-based and intrusion detection services?A. monitor modeB. promiscuous modeC. discovery modeD.

sniffer mode**Answer: A**New QuestionsYou design a network with the following network addresses:192.168.168.0192.168.169.0

192.168.170.0192.168.171.0192.168.172.0192.168.173.0192.168.174.0192.168.175.0Which route address is the best summary of

these network addresses?A. 192.168.0.0/24B. 192.168.171.128/3C. 192.168.168.0/21D. 192.168.175.0/3E. 192.168.0.0/16

Answer: CNew QuestionsA large company requests a hierarchical design model. What tier should be free of physically connected

hosts?A. coreB. accessC. aggregationD. distribution**Answer: A**New QuestionsWhich benefit is an advantage of route

summarization?A. It reduces the size of the routing table.B. It causes routes to be updated more frequently.C. It lowers the cost

metric.D. It enables neighbor discovery.**Answer: A**New QuestionsWhich technology should a company use to connect a branch

office to headquarters via an Internet connection while maintaining confidentiality and the flexibility to run a routing protocol

between the two locations?A. GRE over IPsecB. IPsecC. GRE D. SSL VPN**Answer: A**New QuestionsGRE has been used to

establish a routing-protocol neighbor relationship between two routers, across the public Internet. Which technology can you use to

encrypt this communication channel?A. access listsB. IPsecC. CBACD. IPS**Answer: B**New QuestionsAccording to

fundamental design principles, which location is best for implementing Cisco QoS policies?A. hardwareB. softwareC. Cisco

3900 Series Integrated Services Routers running IOS softwareD. WAN routers running IOS software**Answer: A**
